ABSTRACT OF THE DISCLOSURE

The present invention relates to a film forming method of forming an interlayer insulating film having a low dielectric constant to cover a wiring. In construction, an insulating film for covering a wiring is formed on the substrate by plasmanizing a film forming gas, that consists of any one selected from a group consisting of alkoxy compound having Si-H bonds and siloxane having Si-H bonds and any one oxygen-containing gas selected from a group consisting of O_2 , O_2 , O_3 , O_4 , O_4 , O_4 , O_4 , O_5 , O_4 , and O_4 , O_4 , to react.
